

Security Vacuum Switch

This component will detect the presence of vacuum at its connection point.

- Thanks to these three internal sensors, this component ensures that a vacuum system is fully secured.
- Two sensors will be used for an emergency shutdown line, and the third for a PLC.
- Operating temperature: 80°C max
- Leak rate (static): 1.10-9 mbar/l.s
- Materials present:
 - Flange: SS304
 - Seal: FKM
 - Valve body: EN AW 5083
- This ensures compliance with all electrical safety standards.
- Maximum pressure: 0 - 1 bar
- Special mounting on demand *

Serie	Size	Connection
P1204	1/4	Tube 1 / 4
		Swagelok 1/4
		VCR 1/4
	6	Tube Ø6
		Swagelok Ø6
	16	DN16ISOKF
		CF16
	25	DN25ISOKF
		CF25
	ST	ST
